Deepwater Container Terminal Gdansk

February 2010

DCT Gdansk - the best terminal in Northern Europe in 2009 for Maersk Line

On February 10th, 2010 DCT Gdansk terminal was honoured to receive from Maersk Line Northern Europe the “Terminal of the Year Award 2009”.

On this occasion, Mr Marc Niederer, Maersk Line Senior Director of Northern Europe Liner Operations Cluster presented a beautiful trophy to Mr Boris Wenzel, CEO of DCT Gdansk in presence of both companies’ representatives.

The Terminal of the Year Award came in recognition of DCT Gdansk consistently ranking first on Maersk Line’s terminal scorecard, which is determined according to criteria that include berth productivity, waiting time and port costs. This benchmark includes the largest terminals in Northern Europe: North Sea Terminal Bremerhaven, APM Terminals Rotterdam, Hamburg Eurogate, APM Terminals Zeebrugge, APM Terminal Aarhus Terminal Porte Oceane Le Havre, Felixstowe Trinity Terminal, the Sea Port of ST. Petersburg.

Presenting the award, Marc Niederer expressed great appreciation for the effectiveness of cooperation with DCT Gdansk:

“The award we are presenting to DCT Gdansk signifies that among terminals used by Maersk Line in Northern Europe, DCT Gdansk has contributed most to help Maersk Line to improve the quality of service to clients while at the same time reducing its operating costs.”

Mr Marc Niederer added that DCT’s consistent high standard in container handling, while providing Maersk Line a lower cost of operations than traditional hubs was an important factor that supported Maersk Line’s decision to launch its first direct regular service linking Poland to the Far East in January 2010.

DCT Gdansk offers ideal conditions to handle all types and sizes of vessels, it benefits from the longest rail terminal in Polish ports, offering excellent rail connections, and a 200ha logistics park adjacent to the terminal, is to be awarded to a developer during the first quarter of 2010. Both the terminal and rail facilities have significant expansion capabilities, which will allow DCT to compete effectively with German and Benelux ports servicing the Baltic region.

In the medium term, DCT Gdansk will also develop as a gateway to Central & Eastern Europe as it is located closer than German and Benelux ports to service these destinations.

DCT Gdansk SA is a Polish registered company majority owned by GIF II (Global Infrastructure Fund II), a specialist fund managed by a member of the Macquarie Group of Companies, headquartered in Australia.

Its terminal offers year-round ice-free access with a 17.0m deep approach channel and 16.5m depth along the berth. This makes DCT Gdansk an ideal transshipment hub for St Petersburg and the rest of the Baltic region. Its three post-Panamax gantry cranes are able to work vessels carrying containers 18-across on deck and a ro-ro facility has also been provided.

The rail terminal, 2 x 1000m long and operated by DCT Gdansk, is located adjacent to the marine facility.

DCT Gdansk's first direct link with Asia, Maersk Line's AE10 service, has the following port rotation:

Ningbo – Shanghai – Kaohsiung – Yantian – Hong Kong – Tanjung Pelepas – Le Havre – Zeebrugge – Hamburg-Gdańsk – Gothenburg – Aarhus – Bremerhaven – Rotterdam – Singapore – Hong Kong – Kobe – Nagoya – Shimizu – Yokohama

Maersk Line also operates the following feeder service to/from DCT Gdansk:

F16 Gdansk – St. Petersburg – Bremerhaven

DCT Gdansk terminal also supports regular connections by the following lines:

Containerships:

Gdansk – Teesport – Tilbury – Rotterdam – Helsinki - St Petersburg

Unifeeder/IMCL:

Gdansk – Bremerhaven/Hamburg

Gdansk – Rotterdam

Gdansk – Helsinki – Kotka

Gdansk – Baltijsk

Team Lines:

Gdansk - Hamburg/Bremerhaven
